Executive Summary

The Area Structure Plan Neighbourhood data tables provide supplementary information on specific neighbourhoods for each ASP area. These tables complement the Status of Residential Land Report and allow the reader to see exactly where all of the development changes have occurred throughout the last two years.

The tables are organized and numbered using the same order and format as found in the 1983 Status of Residential Land Report. These tables were completed in this manner in order to be comparative over the last two years to the 1983 report, and they are also directly comparable to the 1986 and 1987 status report.

Each ASP has six tables, except the newer ASP areas which show very little development to date. The tables show development activity starting with the subdivision plan registration activity, vacant subdivided residential land, land servicing activity, total amount of vacant serviced residential land available, approved building permits for each of the last two years and total number of approved building permits issued to date for each neighbourhood.

Revisions to this report are made annually. Totals from one year may not necessarily correspond to the following year's total as redistrictings and corrections/omissions alter totals. For the purpose of this report, lots are considered vacant until a building permit has been issued to them.

If further information on specific areas by subdivision is required the data is available through the Strategic Planning Branch at 428-3572.
